About Grisport

Craftsmenship & Manufacturers: In 1977 Italian brothers Graziano and Mano Grigolato decided to put their know-how to work and set up Grisport, a specialist producer of handcrafted boots and shoes for trekking, leisure and safety. Over the years Grisport has focused on state-of-the-art technology, innovation and R&D to become the leading manufacturer it is today.

Expertise, Experience, Research & Development and Innovation. These are the ingredients used to patent the construction of Grisport's footwear and the techniques used to make high-performance membranes and materials, yet they still incorporate the traditional experience and attention to detail associated with hand-crafted products.

Comfort First, Forever. Grisport consistently thrive to fulfill their paramount, ongoing mission - **Comfort** - By creating a range of more than 5,000 styles of quality footwear featuring stylish designs and state-of-the-art technology. Today with its 40,000m^2 factory and over 2,000 employees, Grisport is one of the world's finest examples of a successful, 'Made in Italy' business.

About Atlantic Safety Wear

Mission: Atlantic Safety Wear Inc. brings the world's most innovative safety wear to North Americans' so that workers come home safe each and every day.

Tag: To do your best you need the best.

Atlantic Safety Wear's Head Office and distribution centre is located in Prince Edward Island, Canada. We are proud to be the exclusive distributor in North America for Grisport safety footwear. We carry work boots and shoes comfortable enough to wear all day and rugged enough to outlast any work environment. These products are guaranteed sustainable, constructed from high quality renewable materials from a low emission environment, where possible.

CSA Z195-14
Grade 1 Toe protection with Protective Sole & Electric Shock Resistance (ESR)

ASTM F2413-11
I75/C75 Impact & Compression toe protection with Puncture Resistance (PR) protection & Electric Hazard (ER)

Metatarsal Protection (Mt)

Factory

At the foot of the Dolomite mountains sits Grisport's state of the art production facilities. The beautiful surroundings and the environment are tremendously important to the company as they aim to be as environmentally friendly as possible. 70% of the power used to produce Grisport footwear comes from solar energy, which is about 850,000 kWh per year.

Grisport's Values

Eco Sustainability:

Grisport maintains the strictest standards of eco-sustainability when selecting raw materials. Furthermore a photo-voltaic system on the factory roof, which covers approximately 15,000 m^2, supplies 70% of the power required for production

Responsibility:

Grisport has produced a Charter of Human Responsibilities, or Code of Ethics, to ensure that the company is committed to respecting the rights, work, and dignity of the people involved on all levels and in all areas of manufacturing their products.

Made in Italy:

Grisport footwear is Italian to the core. Not only do they manufacture all of their products in Italy, they also create and develop process there as well.

Traceability:

Grisport has implemented an effective traceability system that enables them to trace back every step in the production process so they always know which materials were used.

VIBRAM

Thanks to the new design technology used for the sole and breathable perforated toe cap, this line of Vibram footwear is now lightweight with a sporty look yet still offers the same safety features and comfort.

Boa System

This model of Grisport Safety uses the innovative Boa Closure System. With nearly 14 million Boa dials worldwide the award-winning, patented Boa Closure System is reinventing how footwear performs.

LIFETIME WARRANTY
on BOA Closure Systems

Key features:

Durable. Made from aircraft-grade stainless steel, Boa laces are stronger per gram than tank armor.

Secure. Once tension is locked in, Boa reels and laces stay that way.

All-day comfort. Boa reels let you dial in the perfect lace tension, for a custom fit with no pressure points.

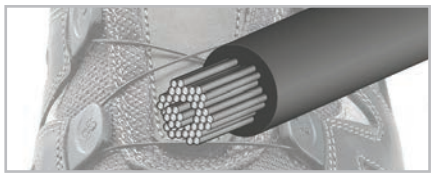
On-the-fly adjustment. Get easy, one handed lace tension adjustment with a quick turn of the Boa dial.

Quick on, quick off. The Boa Closure System is fast. You have more important things to do than tie your boots.

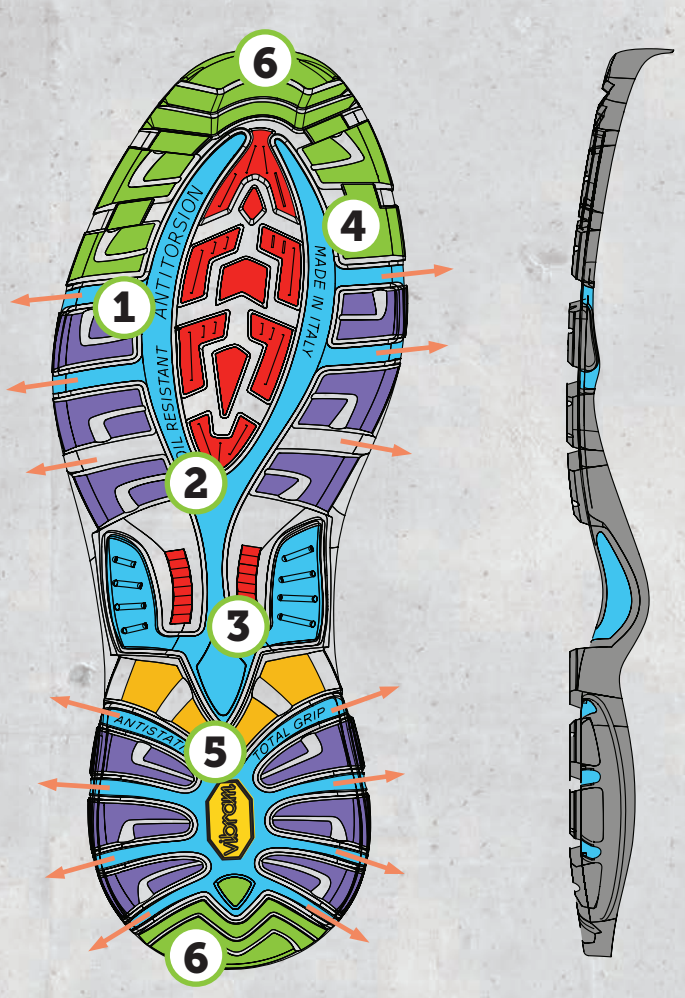
Easy-to-clean. Boa Closures shed mud, dirt and grime and can be easily washed.

To close: Push the knob inward and turn dial clockwise

To loosen: Pull knob outward



Special Steel Cable section



Vibram®

Tested where it matters!

1. **Flex**
   line provides natural rolling
2. **Material**
   different material density for outsole arch stability and comfort
3. **Engraved Shank**
   (90° profile) for better traction on uneven ground
4. **Draining channels**
   to enhance grip and safety
5. **Spider Design**
   for axial guidance and control
6. **Lugs**
   large toe and heel lugs for grip on any terrain

CROSS SOLE

Fully composite, ultralight, breathable & TOTAL GRIP rubber sole. Cross line is unique, thanks to its technologies and materials. Its structure and sole construction add extra grip on surfaces, for added safety and comfort.

Reflective & luminescent treatment for greater visibility

Breathable upper, tear and abrasion resistant

TOTAL GRIP rubber sole

Highly breathable lining

Fiber Glass Toe Cap Protection

The lightest toecap followed by composite and steel. Complies with safety standards.

CERTIFIED AND APPROVED
DGUV112-191
Secosol® by Hartmann
ORTHOPAEDIC PROTECTION

In accordance with DGUV 112-191, it is possible to insert an orthopaedic insole into the Cross Safety line of shoes. Hartmann is Grisport's partner for the health and safety of workers. Matthias Hartmann is a German company specialising in the manufacture of customised orthopaedic insoles. Workers should contact their local orthopaedist in order to have a shoe with the safety requirements and orthopaedic solutions needed for their feet.

Metal free, made of materials not picked up by metal detectors.
