OMNi Apparatech is a premier resource for distributors, offering a one-stop solution for uniquely designed, intelligent apparel. Our brand collections – Zorrel®, Primease® and vel - feature technical, athleisure, and lifestyle apparel for both men and women.

With a single distribution and decoration facility, we seamlessly serve customers across the U.S. and Canada, offering a range of decoration options with low minimum quantities, quick turnaround times, and competitive pricing. Our centralized location ensures fast and cost-effective delivery from coast to coast.

Our vertically integrated supply chain encompasses the entire textile process, from yarn spinning to complete cut, make, and sew production. This capability allows us to develop technically advanced materials, giving us a competitive edge in product innovation and enabling us to offer trendsetting apparel to a diverse customer base.

At OMNi Apparatech, we are committed to providing superior products made from highly technical fabrics, unparalleled quality embellishments, and dedicated customer service.

Because We Think Our Planet Deserves Better.

We are COMMITTED to Sustainability

Produced with environmentally responsible processes.

At our manufacturing facility, we are committed to upholding global standards by reducing our carbon footprint.

Our practices focus on minimizing water consumption, energy use, waste, and CO2 emissions while maintaining adherence to higher chemical compliance standards. We believe embracing environmentally responsible practices enhances the quality of our work while strengthening the value we provide to our customers.

OUR FUTURE GOALS

ENERGY

· Achieve a 20% reduction in energy consumption by increasing the use of renewable energy sources, such as solar power.

CARBON FOOTPRINT

· Reduce carbon emissions by 20%.

WASTE

 Leverage advanced manufacturing technologies and product designs to prioritize the principles of "Reduce, Reuse, and Recycle."

WATER

- Recycle 85% of wastewater for reuse in the dyeing process through the Wastewater Improvement Project.
- Decrease fresh water consumption in the dyeing process by 20%.

DYES & CHEMICALS

- Attain bluesign® certification and ensure compliance with RSL/MRSL standards.
- · Progress toward achieving ZDHC compliance across all facilities.

Inspired by nature, designed for life.

GreenTech is built on the foundation of sustainability, from the initial concept to raw material selection and production processes. It uses less energy, less water, and generates fewer emissions, all to create a more sustainable environment.

SUSTAINABLE MATERIALS

Using premium 100% recycled polyester and BCI cotton, we create super-soft, ethically made fashion.

ENVIRONMENTAL- FRIENDLY PROCESS

Environmental responsibility is integral to our product creation process. We prioritize efficient resource use and strive to minimize the environmental impact of our operations.

RESPONSIBLE WASTE MANAGEMENT

Beyond adhering to global standards and best practices, we go the extra mile by reducing energy use, waste, water consumption, and CO2 emissions, while also meeting higher chemical compliance standards.

The Better Cotton Initiative (BCI) is a program designed to grow cotton using water, chemical fertilizers, and pesticides more responsibly, reducing the environmental footprint of cotton farming. By minimizing the use of non-natural chemicals and reducing water consumption, BCI promotes sustainability in local agricultural communities, improves living conditions, and supports biodiversity.

FIT GUIDE

Please use these size charts to determine the appropriate garment size to order for all fits offered.

HOW TO MEASURE

- 1. **NECK**: Measure the neck circumference where the standard button-type collar might be fastened.
- 2. **SLEEVE LENGTH**: Measure the distance from the prominent bone at the center-back neck, across the shoulder, over the bent elbow, to the center of the wrist bone.
- 3. CHEST: Measure the chest circumference at the fullest point, keeping the tape horizontal around the body.
- 4. WAIST: Measure the waist circumference at the smallest part of the waist, often at or above the belly button, keeping the tape horizontal around the body.
- 5. **HIP**: Measure the hip circumference at the fullest part of the seat, keeping the tape horizontal around the body.
- 6. **INSEAM**: Measure the distance from the groin point to the hem.

EXPERIENCE PREMIUM EASE

EASY TO WEAR

EASY TO CARE FOR **EASY** CHOICE FOR YOU

Blended fabrics continue to reign in the apparel industry, and for good reason. By combining just the right amounts of cotton, polyester or rayon, we create high-quality garments that are soft, durable, flexible, and lightweight. With Primease®, you'll discover your new favorite lifestyle tee – one that seamlessly blends comfort and style.

COTTON: Breathable, durable, comfortable. These are the hallmarks of the classic fabric we know and love. Over time, cotton has evolved from a scratchy industry standard to combed and ring-spun yarns that deliver an unexpectedly soft touch.

POLYESTER: Smooth, shiny, resilient. Polyester is a tough yet lightweight fabric that stands up to wash after wash. It saves us hours of ironing or steam cleaning—wrinkles don't stand a chance. While it may contribute to pilling, the other fabrics in the blend have its back.

RAYON: Soft, excellent drape, radiant. Rayon adds superior drape and flow to a garment. It's a very soft, breathable fabric with high moisture absorbency, making it ideal for summer. Rayon helps reduce pilling, although it doesn't combat wrinkles quite like polyester.

With the right balance, Primease® harvests the best qualities each fabric brings to the table. It's no surprise our customers continue to seek the elevated comfort that Primease® delivers.

ADVANCED TECHNOLOGY DESIGNED WITH OPTIMUM PERFORMANCE FEATURES

Zorrel® stands at the forefront of textile innovation with our proprietary technologies, meticulously engineered to deliver peak performance and unmatched comfort. Each fabric in our collection is designed with advanced features tailored to meet the demands of various activities and environments. From moisture-wicking and temperature regulation to durability and ease of movement, our technologies ensure you stay comfortable, dry, and confident, no matter where life takes you. Explore our range of advanced fabrics − Dri-Balance™, Syntrel™, Elitech™, Technicore™ and Tri-Reg™ − and experience the next level of performance and comfort with Zorrel®.

DRI-BALANCE™

PROPRIETARY DOUBLE-LAYERED CONSTRUCTION ENSURES A COOL, DRY AND COMFORTABLE FEELING

Our textile engineers crafted an intricate knit structure that optimizes moisture transport and dispersion within the cotton layer, allowing air to flow inward and cool the skin. Every Dri-BalanceTM fabric features two layers: a 100% microfiber polyester layer against the skin, plaited to a 100% combed cotton surface. This design ensures moisture is instantly transferred from the skin to the cotton, keeping the wearer dry and cool.

SYNTRELTM

PURE POLYESTER KNITS ENGINEERED FOR HIGH PERFORMANCE ACTIVITIES

Syntrel™ leverages advanced microfiber polyester yarn and knitting technologies to maintain body temperature balance during performance activities. This exclusive Zorrel® fabric excels with its unique blend of specialized hydrophilic and hydrophobic filaments, which work together to wick moisture rapidly away from the body, keeping you dry and comfortable. Lightweight with a pleasing hand feel, Syntrel™ also offers inherent insulation properties, making it the ideal choice for those who demand both comfort and high performance in their activewear.

ELITECH™

THE FUTURE OF SHIRT FABRIC

Elitech™ is crafted with cutting-edge technology to offer unparalleled comfort, breathability, and ease of movement, making it ideal for everyday lifestyles. This innovative fabric marries design with practicality, delivering a performance knit that resists wrinkles and wicks moisture, ensuring you stay cool and confident all day.

TECHNICORE™

PERFORMANCE WITH A TWIST

Technicore™ is a revolutionary technology that transforms 100% polyester fabric using advanced spinning and knitting techniques to mimic the look and feel of fine cotton. Technicore™ surpasses standard cotton by providing UV protection, durable moisture management, superior stability, and pill-resistant qualities.

TRI-REG™

EXTREMELY TECHNICAL FLEECE

Tri-Reg™ is a proprietary Zorrel® fabric that integrates three essential performance features: body heat regulation, wind blocking, and moisture wicking. This innovative fabric keeps you cool when it's warm, warm when it's cool, and dry in nearly all conditions, ensuring comfort in any temperature.
